ex. 2

- a) California's farm industry is important to the US, because it's huge. They produce nearly half of the US fruit and vegetables.
- b) The farmers need the workers to get all the fruit and vegetables into the shops and to earn money. And the workers need the work to earn money for their families. But most of the money goes to the farmers, because the workers only earn little money for their work.
- c) The children of the farm workers often help on the fields, as many workers don't earn enough for the whole family.

ex. 3

- a) Firstly, the unhealthy chemicals, the workers have to work with, are more dangerous for children.
Secondly, a large number of children are hurt in accidents with machines every year.
- b) As the children work about 30 hours a week on farms, they don't have much time for homework or to play.
Half of these child workers even never finish high school.

ex. 4

- a) In farming children can work full-time when they're 12. In other industries they can't work until they're 16.
In other industries children can work only 8 hours on non-school days. In farming there is no maximum on working hours.
